KEYMACRO is a keyboard macro editor application. It allows users to record keyboard shortcuts to act as a macro and run the macro by pressing a hotkey, instead of selecting the application and using its menu to execute the shortcut. You can create macro according to any actions, like copy text, paste text, choose another app, change app's settings, make a new file or run an application. Macros can be recorded once and applied repeatedly on different app or files. You can save the macro to a new file or overwrite the file. KEYMACRO can record hotkeys as a macron, which can be assigned to any shortcut key on the keyboard. User can also create a module, which can be used to execute any action by assigning a hotkey. Additional Features: * Encrypts the macros stored in the files to hide the macros in the file. * Allows user to record any arbitrary hotkey, including mouse movement, movement of the keyboard, dragging of a window, pressing of a button. * Appendable and optional termination character for recording macro. * Supports all keyboard layouts and is not limited to specific keyboard layouts. * No dialog box for recording macro. * Support for drag and drop. * Supports progress bar during recording and can be stopped at any time. * Supports duration recording, which indicates the recording duration in a file. * Works with single and multi keyboard. * Built in FTP and HTTP servers. * Plug-in support for local keyboard, so user can define new keys to access macros. * Supports recording mouse events. * Works in all windows. * Editable in-app text in hotkeys. * Multi-language support. * Built in tutorial for beginners. * Built-in help function and built-in manual for more information. * Recordable system-wide hotkeys. * Ability to start recording macro from menu. * Supports all keyboards and only requires two keys to record. * Supports all window controls. * Supports Ctrl+ALT+Del to terminate recording. * Supports hotswitching. * Support for all major operating systems including Windows 10, 8, 7, Vista and XP. * Supports all major desktop environments including KDE, Windows, Mac OS X, Gnome, and Xfce. * Support for all major browsers including Chrome, Firefox, Safari and Opera. * Supports drag and drop with keyboard. * Support for all
