Without our software, the work will be very difficult. Usually, we recommend such applications for your convenience, we call them the cleaners. Activation details: Download the program by clicking link below, save file to a directory. Then double-click on this file. You can unregistered the program when unistall it. I started looking for a ransomware lately. So far I have seen 2. I see this is a ransomware in Russia. I have only seen it in two files at the time of this post. I am not sure if it is virus or trojan. But I would like to warn you because you might get a virus that is trying to spread thru your network and try to encrypt your files. I hope it is virus and not a trojan. Consider this: I had a computer that was infected with an encryption virus. Then I applied this utility and I got it removed and my computer is still clean. I do not know if it is virus but I think it is a good utility. If I were you, I would delete it. And the application in general should be deleted. Tips: If you got an error like an access violation or access violation writing then restart your computer and delete the file then re-run the application and try again. If you got no errors then delete the file and try again. If you get a trojan in your computer in the future, read my hints above. Infected file: Name: aradia.exe File size: 517 KB Timestamp: Wed, 29 Mar 2016 06:50:11 +0100 Infected time: 2013-02-14T13:53:35.000Z I found this virus and I am not sure if it is ransomware or trojan. It is a virus that claims it will encrypt your files and ask for the payment of "5.5 bitcoins" per file. I guess this is a spamware. If you got a 09e8f5149f
