Numb3rs Product Key is a decimal number checker/converter that can handle most of the commonly used encodings. The program is intended to be simple to use. The dialog box has 3 modes: 1) Binary 2) Octal 3) Decimal The user enters data in a (multi-line) dialog box. Please see the pdf file for the application and technical requirements Numb3rs credits: The primary authors of Numb3rs are John Balling (the program) and Anika Lang (the GUI interface development). Both are at CSU Long Beach. This software was developed on Windows 2000 and Windows XP. The latest build is version 3.00, October 12, 2002. The previous version of the software was from September 1998. Numb3rs Windows versions: - Windows95/98/NT/2000 - 32 or 64 bit - Unicode Numb3rs is essentially an adjunct to the Dos2Unix tool. Numb3rs was written from John Balling and Anika Lang and is a student project at Long Beach State University. Purpose: The purpose of Numb3rs is to provide a user-friendly number conversion utility with a flexible interface. The dialog box is laid out so that you can have a series of number conversion choices without having to use the keyboard. The Numb3rs dialog box is a good example of a good use of standard Windows controls. Use of Controls: The Numb3rs dialog box has a header, a table (with a single row), a range selector, a numeric entry box, a column selector, a chart, 3 buttons and a help button. The header identifies the program and the type of conversion it provides. The column selector allows the user to select one of the output columns in the table (or to not use the table at all). The range selector allows the user to select one of the inputs in a single column. The numeric entry box can be used to type in numbers, hexadecimal, octal, or binary. The user will be prompted to enter "digits" only if the application is set to use the binary mode. The print button lets the user switch to the Hex/Oct/Bin modes (if they are used). The buttons send the dialog box to a new page (where the next set of conversions can be applied). The user can double

Penny, who will try to pitch his first game in more than two years on Saturday against the Rays, said he had a second surgery on his left shoulder on Tuesday at the Al Lang Stadium complex. He had the same type of surgery on his right shoulder in January 2010. The only difference was that he only had a plate put in the back of his shoulder, while Tuesday's surgery included a graft of tendon in his shoulder. "I'm excited," Penny said. "The scar is already fading. I need to start stretching and get ready to be back on the field soon. I'm looking forward to that. I've missed my teammates, and I've missed the fans." The 33-year-old left-hander, who missed the 2010 season and most of last year with left shoulder injuries, said he had been informed that he needed the surgery in September, when the shoulder was still tight, and it was now the early offseason. After one final tryout with his new team, he decided to give the surgery a try. "I think it'll be good for my shoulder, it'll calm things down," he said. "I can get ready this spring and get some innings in. Then, when it's time to go back out, we'll see what happens. It'll still be a tough spring, I'll be limited a little bit. Maybe it'll be my only thing I need to have done. "I'm not going to rush it and try to put a bad shoulder out there. When I need to go out, I need to go out." Penny's rehabilitation and the surgery came through the efforts of the Rays' Dr. James Andrews. Penny had already consulted with Dr. Thomas Clanton
