Program to check if map is giving correct answer at least for 2 questions I'm working on this practice project called "Puzzle Finders" where we write a program to check whether a map (provided) is giving correct answers at least for 2 questions. This is the full code I've come up with so far //This map does not give correct answer for 2 questions. #include using namespace std; int main() { map myMap; map::iterator it; it = 82138339de
