#### **What's New In Belkasoft Evidence Reader?**

Belkasoft Forensic Studio is a powerful application used to create Evidence analysis results in HTML, PDF, text and other formats. With the help of Belkasoft Evidence Reader you can open the gathered Evidence files and take a look at the collected data. As you can see all the

---

extracted information is arranged in a folder structure. You can explore the content of the file using the various tags provided. Tags are a useful feature that makes finding the data you need much easier. If the tag doesn't contain the data you need the app will let you know. NOTE: The Belkasoft Evidence Reader requires the previous installed version of the application in order to function properly. You need to purchase Belkasoft Evidence Reader to use the functions of the app. This is a trial version. Full version is \$29.99. If you like the app please purchase it now. Granular Statistics is an easy to use tool to create a log-file based report. Once you have created the log-file, it is easy to find specific information about your target. Granular Statistics is especially useful when you need to find the last successful login of an individual. The log-file is the perfect starting point to identify such information. Granular Statistics can be used for any type of data collection - from identifying daily traffic on a website to the login history of a particular employee. You can use the log-file to see who is working the most, who is logged the most, etc. The log-file is available in both Windows and Linux formats, and even if you don't have any idea how to write a log-file, you still get a nice interface to create it. You can see from the screenshot above that there is quite a bit of power in Granular Statistics. If you need to find the

---

login history of a particular individual, you can easily sort the log-file by login times. The filter settings are easy to customize, so if you want to collect information about only one particular web page, you can set the filter settings that way. We have written a lot about this app, so you can read our articles to learn how to use Granular Statistics. Read more about Granular Statistics here: \* Build a log-file based report \* Log-file files can be built for Windows and Linux operating systems \* Create an XML or HTML report \* Sort the data in the log-file to find what you need Download Granular Statistics now and try out the free version. If you like the app, purchase it now for \$34.95. Remove all personal data and password from a web site. Ever got a list of all the items from a particular web site? Maybe you were searching for a certain file, or maybe you just wanted to see what
