Russian companies are hogging the leading search results for queries like "mass murder," "gay," "scandal" and "church," according to the website IP GEO, which tracks Google search results across the globe.

Russian companies now occupy almost half of the top 10 search results for all queries related to mass murder, government corruption, fraud and law. Google, Google.ru and Russian search engines Yandex.ru and Yandex.com dominate the list. The site's founding members are all from Russia. The top search results are likely to be very different in other countries, as they are in the U.S. Google is the dominant search engine in much of the world and the world leader for many queries. For example, here in the U.

3 lines of code to force the program to use a new key. This is very useful for preventing pw recovery attempts.

Works in WinRAR only, in WinRAR version 3.xx. RAR Password Recovery Magic provides a password finder with ability to recover the password of

RAR files. This utility works in combination with a specially designed set of algorithms and criteria. You can force a recovery of the password with the help of a specially designed code, which you can activate from the Help menu. When this code is active, the program will display the old password as soon as it finds a match, even if the

attempt to decrypt was not successful. Other programs have special features that help decrypt RAR files. They can open a password-protected RAR and create a backup copy of it in the original file format and with encryption key unchanged. The author of this program - Randy McGehee - developed a similar program and provided support service in case of problems. The author of this utility is David Devitt, and is a long-time programmer. The program is a simple and easy to use password finder for RAR archives. This program is free and has no restrictions. Attention: The

program is for individuals only. Free Shareware programs are, in most cases, used to try out a program or read a specific program feature without purchasing a license. Easy RAR Password Recovery 3.8 RAR Password Recovery Magic is a lightweight application that is able to find out forgotten passwords of RAR files. You can choose from several parameters (number of characters, alphanumeric symbols, etc.) and encryptions (WinZip, ZIP, ZIPx, rar, 7z) in order to decrypt a password protected RAR archive file. You can open a list of password protected RAR

files and then change settings or select several files at once. After that you will be able to find out the right password for them with just a few clicks. How to recover lost or forgotten RAR passwords with Easy RAR Password Recovery 3.8? If you know the password and where the RAR archive file is located, launch the Easy RAR Password Recovery 3.8. The new program for recovery of forgotten RAR passwords. Simple, fast and reliable program for recovering RAR passwords. The tool uses a simple password guessing algorithm based on the dictionary file, which can contain 1,000,000 passwords. When recovering a password, the user must specify which password form the user knows. Dictionary is not full (there are keys and passwords). Based on the dictionary file, the application tries to guess the password. The program doesn't work 100%, because in general

is not possible to guess a password.
The program uses dictionary file that contains maximum 100,000 entries.
For password recovery, the dictionary contains in its file at least one entry.
